

SAP ABAP Training in Bangalore:

Cranesoft offers best SAP ABAP Training in Bangalore. Cranesoft Solutions is a leading IT Consultancy, SAP Training, and an Outsourcing organization provides an "end-to-end" SAP implementation, support, services, and solutions. We have a team of highly talented faculty members who are skilled IT professionals, working in major MNCs, who are having more than 8 years experience on SAP ABAP. The entire training is going to be conducted on live server. Since ABAP is the only technical module of SAP and most of the sessions are practical ones, and for that, we will be providing 24/7 lab facility so that the candidates can practice as much as possible. SAP ABAP consultants are in great demand and every company is hiring. We have completed more than 50 batches of SAP ABAP Training till now. Once the course is finished, our faculties will be taking care of resume modification and interview preparations. Our placement team will be providing 100% placement support for our candidates, and most of them are working in major MNCs as SAP ABAP consultant. Here at Cranesoft Solutions, we do have internal requirement also for our in house implementation project. Join today to become an SAP ABAP Consultant within a short period of time.

What is SAP ABAP?

SAP ABAP is the only technical Module of SAP among so many modules. ABAP stands for "Advanced Business Application Programming". SAP ABAP is a customized coding language to develop RICEFW objects (Reports, Interfaces, Conversions, Extensions, Forms and Workflows) within the ABAP.
