WHAT IS SAP EHS?

SAP EHS module allows companies to create a safe work environment, manage dangerous goods information , handle waste and adhere to rules & regulations when shipping hazardous products within the premises and outside. There are laws and federal/state regulations in place that require appropriate level of information that is communicated to the parties handling these products that may be hazardous. Many countries and governments have realized that poor work environment and safety standards result in huge costs to the state and federal governments. EH&S module in SAP enables management of occupational health of employees especially in cases where individuals are exposed to increased levels of chemical, physical or biological substances.
